

Senior Expert Civil Engineering **Daniela Müller**

Daniela comes from a civil engineering background and has been working as a project manager at RWE Technology International since autumn 2022.

Her previous experience in the field of building and plant construction includes both new construction and refurbishment projects for public clients as well as private clients within the industry.

The success-oriented management of the classic project management areas of costs, deadlines, quality and risks are just as close to her heart as the improvement of the culture for health-safety environment in the projects.

In order to achieve various project goals, she successfully uses her management skills of many years in combination with her broad technical knowledge. She is also involved in multi-layered, long-term and forward-looking internal projects.

Due to her reliability and strong customer focus, Daniela is the ideal contact person for our clients.

She completed her studies in civil engineering at the University of Karlsruhe (KIT) with a diploma.

1 What gives you most satisfaction in your work?

What I like most about my role as a project manager is the diversity and variety of tasks of my different projects and the responsibility to ensure that the goal is achieved satisfactorily for everyone.

2 Why did you choose RWE TI?

RWE Technology International offers me the opportunity to work on exciting, future-oriented projects and gives me the necessary framework to perfectly manage the balancing act between work and family.

3 What three words best describes you?

Organised. Determined. Resilient.

4 „Our aim is your success.“ – What it means to me:

We don't manage, we make things happen! For our customers and their success.
