

Project Engineer Mechanical Engineering **Julia Dorlöchter**

Julia is a project engineer and focusses on energy engineering. She manages projects in the decommissioning of nuclear power plants, construction of solar systems and supports hydrogen projects.

Julia studied mechanical engineering at the Ruhr-University Bochum. Within her master program, she acquired profound practical knowledge in energy engineering and gained international experience in green engineering during her studies abroad in the United States. Through internships she gained experience in different fields of energy production.

1 What gives you most satisfaction in your work?

I want to work with great colleagues and to see the results we can achieve together.

2 Why did you choose RWE TI?

I like to work worldwide in international projects with great engineers on sustainable projects.

3 What three words best describe you?

Open minded. Team player. Dependable.

4 “Your challenge is our passion!” – What it means to me:

We will solve your challenges and give you the best solution because that is what we enjoy and only challenges make life exciting.
