RWE New Energy

Expertise

Technical Advisor, Due Diligence, Wind Energy Project, Local Funding Regime, Technical Design, Environmental Circumstances

Our Services

- Due Diligence
- Review of local funding regime
- Review of technical design
- Review of environmental circumstances

Project description

RWE New Energy appointed us as an independent engineer to conduct due diligence for a wind energy project in the desert of Egypt. Our role was to assess technical, environmental and financial aspects with a focus on local funding regimes.

On conducting a thorough review we made several recommendations to the client and provided a comprehensive report of the project to confirm all risks were properly mitigated.
