

Head of Project Portfolio – Project Development & Special Projects

## Ralf Bielack

Ralf is head of project development with extensive experience in managing complex construction projects with up to 1,300 workers on site.

Ralf started his career within the RWE Group as Project Manager at RWE Power AG in 2008. His 27 years of practical experience have led to his expert knowledge in the development and construction of power plant projects, the development of IPP projects and the provision of related engineering and project management services to internal and external customers, as well as O&M services to external customers. In his role he has completed power plant projects on several

continents, having full responsibility for budget, schedule, quality, health and safety.

Ralf holds a Master in Mechanical Engineering and a Master in Business Administration from RWTH Aachen University in Germany.

### 1 What gives you most satisfaction in your work?

To transform a green field, wherever in the world located, into a running power plant, while at the same time having fun in an intercultural team.

### 2 Why did you choose RWE TI?

Due to the possibility to work with a company, which excels in all steps of the power generation value chain.

### 3 “Your challenge is our passion!” – What it means to me:

To listen well in order to understand all facets of your challenge – and then to work hard to deliver an excellent solution by combining your know-how with ours.
