

Expert Site Management and Commissioning **Johann Schnarbach**

Johann is a commissioning expert for new construction plants in the energy and power plant sector.

As expert for new construction, he is responsible for planning of commissioning, progress review, cold and hot commissioning, test runs of equipment, process commissioning, acceptance procedure, optimization of plant control, automation and staff as well as operator training.

Johann is also skilled in leading commissioning teams and realizing special tasks. Together with his international experience (in countries like South Africa, China and U.S.) and his very good language skills (in German and English),

Johann has more than 18 years of professional experience on the construction site in planning and implementation of commissioning.

In addition, he is responsible for the assumption of the tasks of the site management and provides the technical and organizational support before and after the COD of the plant.

Johann completed his studies in Electrical Engineering with a focus on automation technology at the University of applied Science Südwestfalen, Hagen.

1 What gives you most satisfaction in your work?

When you see how the project grows and grows every day. If you master the daily, weekly, monthly, annual goals that you have set for yourself. If you meet deadlines and everyone pulls together.

2 Why did you choose RWE TI?

I am impressed by the projects that RWE Technology International can handle. RWE Technology International offers me the opportunity to develop myself both - professionally and personally - while always learning new things

3 What three words best describes you?

Pragmatic. Flexible. Cooperative.

4 “You get your best solution“ – What it means to me:

The customer and business partner can be sure that their needs and wishes are always our priority.
