

PAYMENT REPORT

2017

Report of the RWE Group on payments made to public authorities pursuant to Section 341q-y of the German Commercial Code

RWE Aktiengesellschaft
Altenessener Straße 35
45141 Essen
Germany

The RWE logo consists of the letters 'RWE' in a bold, blue, sans-serif font.

2017 PAYMENT REPORT

Basis of the report

Headquartered at Altenessener Straße 35 in 45141 Essen, Germany, RWE AG is a stock corporation as defined by Section 341q of the German Commercial Code. As a parent company as defined by Section 290 of the German Commercial Code, pursuant to Section 341v, Paragraph 1 of the German Commercial Code, RWE AG is obligated to prepare an annual consolidated payment report as at least one of its subsidiaries is active in the mineral extraction industry. Pursuant to Section 341s, Paragraph 2 of the German Commercial Code, stock corporations included in the consolidated payment report are exempt from the obligation to prepare their own payment report.

Reportable payments are those made to public authorities if at least €100,000 in payments are made to a single public authority (Section 341t, Paragraph 4 of the German Commercial Code) and one of the reasons for the payments is in accordance with Section 341r, Item 3 of the German Commercial Code. Disclosure on such payments must be made by country, broken down by receiving public entity, reason of payment and project.

Companies included in the report with activities in the mineral extraction industry

Pursuant to Section 341q of the German Commercial Code, large stock corporations and large commercial partnerships with domestic headquarters that are active in the mineral extraction industry or logging in primary forests are obligated to prepare an annual payment report. None of the RWE Group companies is currently active in the logging business in primary forests. If RWE Group companies conduct logging in primary forests in the future, the criteria applicable to their reporting duties will have to be defined.

Activities in the mineral extraction industry as defined by Section 341r, Item 1 of the German Commercial Code are necessary in the RWE Group due to the opencast mines used for electricity generation from lignite (NACE Code A0520 pursuant to EU Regulation No. 1893/2006). The term 'activity' as defined by Section 341r, Paragraph 1 of the German Commercial Code is interpreted by the RWE Group within the meaning of the infection theory for the reporting duty. Companies with a reporting duty within the RWE Group are RWE Power AG ("RWE"), Cologne and Essen, and Mátrai Erömü Zártkörűen Működő Részvénytársaság ("Mátrai"), Visonta (Hungary), due to their opencast mines and Rheinischen Baustoffwerke GmbH ("RBS"), Bergheim, the business activities of which result from the opencast mines. Therefore, as of 31 December of each year, it must be determined which of the fully consolidated Group companies is active in the mineral extraction industry.

In the middle of December 2017, RWE Power AG sold Hungary-based Mátrai to a consortium consisting of Czech-based EP Holding and Hungarian investor Lőrinc Mészáros. The transaction closed in March 2018. The company was deconsolidated as of 31 March 2018. This report thus contains all of the relevant payments made by Mátrai for the entire 2017 financial year.

Germany

RWE Power AG, Cologne and Essen

The fields of business of RWE Power AG, a subsidiary wholly owned by RWE AG, are the commercial operation and maintenance of its power stations consisting of lignite-fired, nuclear and hydroelectric power plants as well as of the opencast mines in Germany.

RWE Power AG is among Germany's leading energy recovery and generation companies. RWE Power AG has a large commodity base at its disposal thanks to its opencast lignite mines at Hambach, Garzweiler and Inden. This puts the company in a position to act flexibly and successfully and to manage the goals of climate protection, security of supply and profitability over the long term in a tough competitive environment. In addition, synergies are leveraged, which strengthen the company's competitive position.

For the preparation of the payment reports, the opencast mines are considered projects.

Rheinische Baustoffwerke GmbH, Bergheim

Rheinische Baustoffwerke GmbH is a subsidiary wholly owned by RWE Power AG, which operates plants for the production of gravel and sand located in the opencast lignite mines and in the areas bordering the opencast mines. The main market is largely in the greater Cologne-Düsseldorf-Krefeld-Aachen area where Rheinische Baustoffwerke GmbH ranks among the largest gravel and sand companies. Furthermore, Rheinische Baustoffwerke GmbH operates receiving points for uncontaminated excavated earth and rubble and trades in purchased building materials (gravel and sand as well as solid rocks such as basalt and lava). The gravel works are jointly presented as a single project.

Hungary

Mátrai Erőmű Zártkörűen Működő Részvénytársaság, Visonta

In the year under review, Mátrai was a 51% subsidiary of RWE Power AG. The power station operated by Mátrai is primarily fuelled by lignite sourced from the company's opencast mines in Visonta and Bükkábrány. Moreover, the company generates electricity from renewables by firing biomass and operating a solar power station. Additional business fields are the sale of lignite, ash and gypsum as by-products of flue gas desulphurisation.

Commentary on the payment report for Germany:

1. RWEP's opencast mine development work normally involves swapping assets – in particular land – with the municipalities located within the opencast mining area or with other state entities. If the value of the assets relinquished is below the value of the assets received, compensatory payments are made by RWEP to the corresponding state entities. These payments are included in the payment report, but the value of the relinquished assets is not, as they can be netted against the value of the assets received (cf. IDW comments 1/2017, note 84).
2. The usage fees paid to Landesamt für Natur, Umwelt und Verbraucherschutz Nordrhein Westfalen are water withdrawal fees paid by RWEP and RBS. Credits in the period under review relating to water withdrawal fees paid in earlier years were not deducted (cf. IDW comments 1/2017, note 73).
3. RWEP and RBS are controlled companies that belong to the tax group of RWE AG. The corporate and trade tax payments made by RWE AG as controlling company are not reported as the activities of RWEP and RBS in the mineral extraction industry are not the focal point of the activities of the RWE Group. In accordance with the IDW comments 1/2017, note 109, the tax payments are not categorised.
