Case Study

Brighton Bike Hub

Brighton Bike Hub is a volunteer-run project based in the heart of Brighton.

Working towards making the streets of Brighton a safer, cleaner and healthier place to travel around and live in by reducing waste and cutting carbon emissions. The project also saves many local people money by helping them access vital services by promoting and providing a much cheaper way to travel.

Members of the public can come to the hub and repair their bikes, get advice, help and have free access to tools and workshop space. Brighton Bike Hub offers affordable new and used parts and a range of refurbished bikes for sale.

£10,000 from Rampion Offshore Wind Farm Fund helped pay staffing costs including a project co-ordinator as well as purchasing a shipping container for bike storage and for running classes and DIY repair sessions.

communities,
creating
jobs & new
opportunities

Case Study

FareShare Sussex & Surrey

Fighting hunger, tackling food waste, creating opportunities – FareShare Sussex & Surrey rescues surplus food that would otherwise go to waste from supermarkets, businesses and farms.

The organisation works with over 153 organisations and charities to make sure food gets to people who need it most. Redistributed food is used in preparing low-cost or free meals, to stock cost-reducing community fridges and to supply emergency food parcels.

Their new electric van which was part-funded from Rampion Offshore Wind Farm Fund helps to redistribute food to those most at risk of food poverty, whilst also reducing carbon emissions. The £10,000 award enables the 150+ army of volunteers to distribute food to food banks, community fridges & pantries, community meals and to residential settings.
