

SAFETY ON MITTELPLATE

FOR YOUR OWN SAFETY
YOU SHOULD IMMEDIATELY FAMILIARISE
YOURSELF WITH THE FOLLOWING

IF YOU HAVE TO LEAVE MITTELPLATE,
YOU WILL RECEIVE INSTRUCTIONS
FROM THE NAUTICAL ENGINEER

- Position of next fire alarm / phone / fire extinguisher
- Route to muster station
- Location of muster station
- Alarm signals

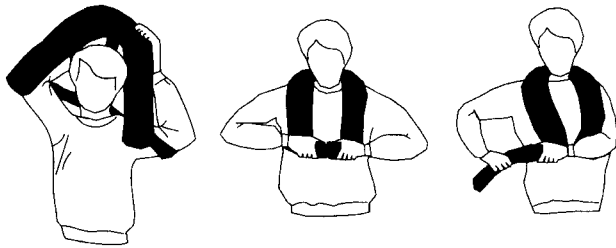

- Dress warmly in preparation for leaving Mittelplate
- Stay calm
- Go to the muster station
- Listen to instructions coming over the loudspeaker system
- You will be given additional information and instructions at the muster station

HOW TO PUT ON A LIFE JACKET

Wear the life jacket over your normal clothing. Open the clasp and put the life jacket on like a normal waistcoat. If it has a side clasp, pull it over your head. Close the clasp properly. Never leave a life jacket undone.

Adjust the waist belt so that there is a clearance of approx. 2 cm (width of two fingers) between your body and the belt. Only if the life jacket fits firmly around your body will it keep you in a stable position on your back in the water.

Caution: It is dangerous to wear the life jacket loose or undone.

The life jacket will inflate automatically when immersed in water. When not in the water or if the automatic opening mechanism fails, you can start the inflation procedure by sharply pulling the ripcord.

DOS AND DONT'S ON MITTELPLATE

- Smoking is not permitted on Mittelplate – except in designated smoke areas
- Alcohol and drugs are banned on Mittelplate
- Mobile phones must not be used outside the living quarter
- Please keep all areas clean and tidy
