RWE AT A GLANCE.

RWE is one of Europe's five leading electricity and gas companies. The Group is engaged in electricity generation, energy trading as well as electricity and gas transmission and sales. More than 70,000 employees supply more than 16 million customers with electricity and around 8 million customers with gas.

RWE is the No. 1 power producer in Germany, No. 2 in the Netherlands and No. 3 in the UK. We are continuously expanding our position in Central and Southeastern Europe. RWE is moving forward with the development of renewable energies in particular. The investment volume earmarked for this purpose totals approx. € 1 billion annually. Additional extensive investments are made in new less polluting conventional power plants and the development of grid infrastructure.

With new products for domestic, commercial and industrial customers, RWE has positioned itself to meet changed customer needs in the areas of electricity and gas sales as well as energy efficiency. Climate protection and energy efficiency are gaining increasing importance, with electromobility playing a major role.
