

Tips for downloading the ringtone:

The ringtone and the sms tone come in an MP3 file format. In general, all newer mobile phones (not older than two years) support this ringtone format.

To download this ringtone to your mobile phone please proceed as follows:

- 1.** Place your cursor on the link „giant tones for your mobile phone“.
- 2.** Right mouse click.
- 3.** Choose „save target as“ and store the file on your harddrive/desktop. Click “open” to listen to the song right away or click “close” to finish the download.
- 4.** To transfer the file to your mobile phone you need a USB cable which you connect to your computer (please note that such a cable is not always included with a mobile phone). Transferring the ringtone works similar to e.g. transferring photos from a digital camera to your computer. You may also transfer the ringtone to your mobile phone using an infrared or Bluetooth connection.
