

Head of Contract Management & Project Support **Bernd Kamphuis**

Starting 25 years ago as a lawyer with a focus on construction law, Bernd is now, for over 20 years, engaged in the energy industry in the power plant construction and revision business. A core activity is the contract and claim management. Bernd has extensive experience in all aspects of power plant projects, he takes care of the projects from the beginning to the end. Bernd does not only have excellent knowledge of commercial aspects but also of the technical items.

During his years of practical experience Bernd worked in Europe (Germany, the Netherlands, UK, and Turkey) as well as in South America (Colombia) and Asia (Philippines).

In addition, property management & site development have been added to this in the last years. This includes among others the dismantling of conventional power plants for the construction of renewable energies as well as the purchase or sale of real estate.

1 What gives you most satisfaction in your work?

The planning and implementation of projects is tainted with complexity and numerous rows stumbling to solve this in a team for customer satisfaction, this is what makes me feel good.

2 Why did you choose RWE TI?

RWE TI provides the customer the whole energy spectrum from conventional to renewables.

3 “Your business is our daily work!” – What it means to me:

Because we have not only looked into and took care of the entire new construction business of the RWE Group, but also have been involved in revisions and efficiencies programs, it is a daily business for us. You will profit from our experience.
