

Team Lead Plant Engineering **Nicola Peiser**

Nicola Peiser is a highly experienced mechanical engineer. She started working 2003 as a trainee in the oil and gas industry. After several years of international projects and assignments, e.g., in Libya and the Netherlands, she joined RWE in 2008 as a project engineer for piping and firefighting systems for hard coal power plants. Part of her work is preparing tender documents, dealing with interfaces, managing subcontractors and stakeholders always having the complex overall picture in mind. As RWE is now entering new technologies and looking towards renewables, Nicola is developing new skills within hydrogen projects.

She is excited to work in this new field with international focus. Throughout her now 18 years of professional experience, project management always played a major role. She is a certified IPMA Level D project engineer as well as a certified green belt in lean management.

1 What gives you most satisfaction in your work?

The purpose within my work always motivates me to give my best.

2 Why did you choose RWE TI?

RWE TI gives me the opportunity to work in international and interesting projects in various fields within energy generation.

3 What three words best describe you?

Team player. Passionate. Organised.

4 “Your aim is your success!” – What it means to me:

Your target is the target for my work. Your success motivates me to give my best.
