

Project Engineer

## Veronica Carmen Lemke

Veronica joined RWE Technology International in 2021 as a Project and Lead Civil Engineer and is responsible for a number of RWE power plant and turnkey construction projects.

Her responsibilities include the coordination and management of planning, engineering and subcontractor services in Germany, the Netherlands and Spain.

Her wide-ranging technical expertise involves the coordination of planning offices and subcontractors, the tendering and award processes, quality assurance and design and

drawing review in terms of technical details.

Due to her international work in Europe (e.g. Spain and the Netherlands) and her extensive language skills in German, English, Spanish as well as Portuguese and Dutch, Veronica is an expert for versatile power plant construction projects.

She successfully completed her studies in civil Engineering at the University of Duisburg-Essen and spent a semester abroad at the University of California, Berkeley, USA.

### 1 What gives you most satisfaction in your work?

I particularly like the atmosphere with my colleagues.

### 2 Why did you choose RWE TI?

At RWE Technology International, I can work on exciting and innovative projects, which allows me to develop both professionally and personally.

### 3 What three words best describes you?

Open. Organised. Motivated.

### 4 “You get your best solution“ – What it means to me:

We work out the best possible result in relation to the client's needs.
