# Our Marketportal.

Make the most out of your available screen real-estate by using the smart features of our Marketportal. Intelligently manage multiple products and tenors from the streaming grid in a “Marketview”.

## Features included:

- Sophisticated workspace management
- Default settings to speed up trading in fast markets
- Highlighted entries in the grid
- Different types of views

# Trading Features.

State-of-the-Art technology will support your personal way of trading in the best possible way by offering low latency and high availability. ECT offers you various ways to receive the great pricing.

Insert limit orders based on common execution types (GTC, AON, FOK, IOC) for your buying and selling interest against our internal liquidity.

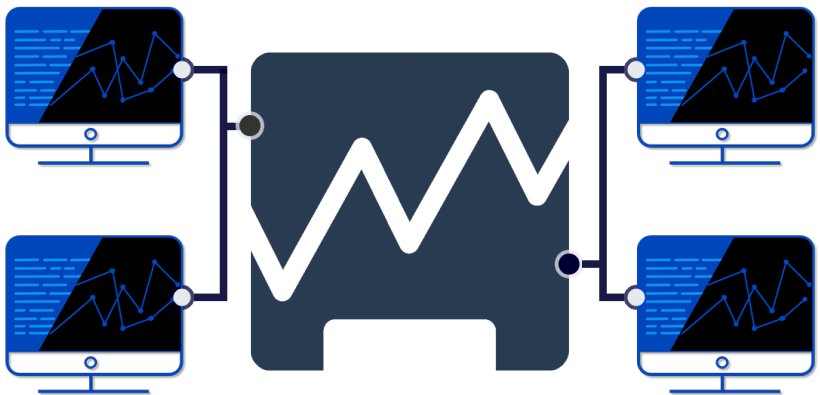

Request pricing of non-standard quantities, illiquid tenors and custom profiles by using our advanced RFQ feature. The system support instant and scheduled pricing to get the pricing when you need it.

ECT's various blotters (e.g. OrderBlotter, TradeBlotter, ...) will support your daily trading and allow you to stay ahead of your trading processes.

# Connectivity.

For us, connectivity is key. Get the right grip of the market for your trading desire by connecting your system (e.g. ETRM, Algo suite, etc.) to ECT via our API solution.

The API solution offered by ECT is built for trading & reporting purposes and easily implemented.

Our extended connectivity via partnerships with industry leading solution providers delivers additional benefits.

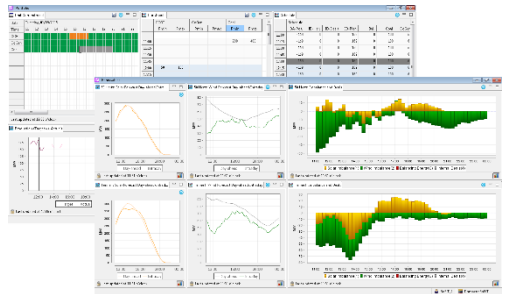

# Extended Connectivity.

## Intraday trading with ITA:

With the intraday trading solution ITA from Volue, you place your bids directly in the ECT portal and record the resulting transactions fully automatically.

You can integrate the prices from the portal into your processes in real time.

## ITA offers you:

- Support for your intraday process
- Seamless connection of upstream and downstream systems
- Coupling with Portfolio Optimization
- Positions, timetables and market opportunities at a glance
- Manual and automated trading

# Interested?

Get in touch with us and request access to our DEMO environment to get your deep dive.

ECT is our way of offering next generation trading and we are convinced that it will add benefits to your market access setup by offering the lowest possible entry fees and no hidden extra-charges.

Contact us to receive further information on ECT and your personal login credential to the DEMO environment.
