Press release

RWE secures two more onshore wind projects at French regulation latest bidding round

- RWE has successfully secured two of the 42 projects in the latest bidding round
- Fully owned by RWE, the two projects have a total capacity of 21.6 MW
- The Balinot wind project reinforces RWE's regional presence in the Oise department, and the Langonnet project contributes to its development in Brittany.

Essen/Clichy, 10th November 2025

The French Energy Regulatory Commission (CRE) has published the results of the latest onshore wind tender (10th round of the PPE2 – Multiannual Energy Program), for a total capacity target of 925 megawatts (MW). More than 90 projects were submitted, with only 42 selected, representing a total capacity of 952.8 MW at an average price of €86.6/MWh.
RWE has secured two wind projects with a combined capacity of 21.6 MW: the Balinot wind project, located in the Oise department, and the Langonnet project in Morbihan. Each project has an installed capacity of 10.8 MW and consists of three wind turbines. Together, they will supply low-carbon electricity to more than 15,000 households.

Katja Wünschel, CEO RWE Renewables Europe & Australia: "I would like to congratulate all the teams who contributed to RWE's success in this tender. The consistency of our achievements, tender after tender, reflects the strength of our long-term strategy and the dedication of our teams to developing high-quality projects across France."

A success that reflects a dynamic year of new projects for RWE in 2025

The year 2025 has been a successful one for RWE in France, with more than 83 MW of wind and solar projects commissioned in recent months. In addition, the Group secured 82 MW in the CRE's 2024 onshore wind tenders and, with these two new projects, now totals 172.6 MW of onshore wind capacity and 19.6 MWac of solar capacity awarded in the 2025 CRE tenders. This performance positions RWE among the leading players in France's energy transition.
RWE currently has a portfolio of approximately 1.6 GW of onshore wind projects and 1 GWp of solar projects at various stages of development in France, including 408 MW awarded in CRE's tenders, and has commissioned 275 MW since entering the French market in 2020.

RWE
RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driven by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - *Our energy for a sustainable life.*

RWE Renouvelables France
A subsidiary of the RWE, RWE Renouvelables France is one of the leading developers and producers of renewable energies on the French market. In France, our teams develop, finance, build and operate wind and solar farms. The Group is currently developing over 1,6 GW of onshore wind projects, 1,1 MWp of solar projects and has commissioned 275 MW.

Forward-looking statements
This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
