

Press release

RWE starts construction of 92 megawatts of onshore wind capacity in Italy

- **Serra Palino wind farm, 47 MW, located in the Apulia region**
- **Venusia wind farm, 45 MW, located in the Basilicata region**
- **Commissioning planned for the end of 2026**
- **In total, the new wind farms will be able to generate enough green electricity to supply more than 83,000 households**

Essen/Rome, 23 October 2025

RWE has begun construction of two major wind farms in Italy. The 47 MW Serra Palino wind farm is located in the province of Foggia, in the Apulia region and will consist of eight 5.9 MW turbines. For the 45 MW Venusia wind farm, located in the province of Potenza in the Basilicata region, RWE will install eight 5.6 MW turbines. Both projects were successful in the latest Italian renewables auction with commissioning planned for the end of next year.

Katja Wünschel, CEO RWE Renewables Europe & Australia: “Our journey to support Italy’s energy transition continues. Following the commissioning of the [Mondonuovo](#) wind farm in July, we have started construction of two new onshore wind farms in Italy. Once commissioned, these projects will be able to supply green electricity to more than 83,000 Italian households. Onshore wind power is a cornerstone of Italy’s energy transition, and for good reason: it is clean, mature and affordable.”

RWE Renewables Italia – strong presence in Italian market for renewables

RWE is a key player in the Italian renewables market. The company takes an integrated project approach that incorporates the development, construction and operation as well as marketing of wind farms and solar plants. RWE operates 17 onshore wind farms in Italy, with a combined installed capacity of 598 MW – enough to supply more than 500,000 Italian households with green electricity every year. In addition to its latest onshore wind farms, RWE is currently building its first commercial-scale [Agri-PV plants](#) Morcone (9.8 MWac) and Acquafredda (9.3 MWac) in the Campania region.

RWE

RWE is leading the way to a clean energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
