Press release

RWE commissions 47.2 megawatt wind farm in Italy

- **Serra Palino onshore wind farm is located in the Apulia region**
- **Eight 5.9 MW turbines capable of supplying approximately 40,000 Italian households with green electricity**
- **RWE increases its installed capacity in Italy to approximately 670 MW**

Essen/Rome, 2 November 2026

Less than one year after construction start, RWE has commissioned its Serra Palino onshore wind farm in the Apulia region of southern Italy. The project is located in the municipalities of Sant'Agata di Puglia and Candela, in the province of Foggia. With a total installed capacity of 47.2 megawatts (MW), the wind farm comprises eight wind turbines of 5.9 MW each and is capable of generating enough green electricity to supply approximately 40,000 Italian households.

Sopna Sury, CEO RWE Renewables Europe & Australia:
"The commissioning of Serra Palino less than a year after the start of construction is an achievement we can be truly proud of, and one that reflects the outstanding work of everyone involved. And we are not stopping there: today, we have around 200 MW of new wind and solar capacity under construction in Italy. This marks another step in our commitment to expanding renewables in Italy and contributing to an increasingly reliable and competitive energy system."

RWE Renewables Italia – strong presence in Italy's renewables market
RWE is a key player in the Italian renewables market. The company takes an integrated project approach that incorporates the development, construction and operation as well as the marketing of wind farms and solar plants. With 18 onshore wind farms, one photovoltaic plant and three agrivoltaic plants in operation, RWE currently manages a total installed capacity of approximately 670 MW in Italy, enough to supply green electricity to more than 550,000 Italian households. In addition, RWE currently has around 200 MW of further wind and solar capacity under construction in Italy.

RWE

RWE is shaping the energy world of tomorrow. To this end, the company is investing billions of euros in offshore and onshore wind, solar energy, battery storage, flexible generation assets and, through its shareholding in Amprion, in the expansion of Germany's transmission grid. The portfolio is complemented by its global energy trading business. RWE is already one of the leading companies in the field of renewable energy. Around 20,000 employees work for the company worldwide. With its integrated portfolio and broad project pipeline, RWE is ideally positioned to meet the growing global demand for electricity driven by electrification and artificial intelligence. At the same time, the company is making an important contribution to ensuring a secure, affordable and climate-friendly energy supply. RWE is decarbonising its business in line with the 1.5-degree reduction pathway, will phase out coal by 2030 and aims to achieve net zero by 2040 – fully in line with the company's purpose: Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
