

Press release

RWE secures Contracts for Difference for 290 megawatts of solar PV and onshore wind capacity in UK Allocation Round 7

- **RWE has been awarded Contracts for Difference at a strike price of £65.23 per megawatt hour for five solar PV projects and £72.24 per megawatt hour for three onshore wind projects**
- **The combined maximum capacity of the successful RWE projects amounts to 290 megawatts of renewable capacity for the UK, capable of powering around 240,000 homes per annum**

Essen/Swindon, 10 February 2026

The UK government has announced today the results of Allocation Round 7 (AR7) for 'Pot 1' established renewable technologies, including onshore wind and solar PV. In the competitive auction, five RWE solar projects comprising 215 megawatts (MW) and three onshore wind projects totalling 76 MW were successful. The solar projects secured Contracts for Difference (CfD) at a strike price of £65.23 per megawatt hour (MWh). The onshore wind projects secured contracts at a strike price of £72.24/MWh. Strike prices are reported in 2024 prices and will be inflation-indexed for the 20-year duration of the contract.

RWE already operates over 30 onshore wind farms in the United Kingdom, with a total capacity of 730 MW. Following the commissioning of its first solar site in June last year – the Langford project in Devon – RWE has a total of four operational solar PV sites in the UK with a combined installed capacity of 185 MW. A further nine PV projects with a combined capacity of around 440 MW are currently under construction. In addition, a further four onshore wind sites with a combined capacity of around 230 MW are currently under construction.

Katja Wünschel, CEO RWE Renewables Europe & Australia: "What a great success! We are delighted to have secured long-term offtake contracts for eight solar and onshore wind projects in Allocation Round 7. This achievement marks an important milestone for RWE as we continue to deliver our UK solar and onshore wind development pipeline and underscores the strategic importance of the UK market to our business."

Overview of RWE's successful projects

Technology	Project	CfD contracted capacity
Solar PV	Raspberry	49.9 MWac
Solar PV	Belvoir	49.9 MWac
Solar PV	Honeyhall	30.0 MWac
Solar PV	Quarry	35.0 MWac
Solar PV	Brinsea	49.9 MWac
Onshore Wind	Enoch Hill 2	9.6 MW
Onshore Wind	Clachaig Glen	52.8 MW
Onshore Wind	Golticlay*	13.2 MW
		290.3 MW

*Representing 2 of the 13 consented turbines (11 turbines are already under construction).

RWE

RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driven by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.

Data Protection
