

## Energy Investment and Transaction Advice

Our clients constantly seek a competitive edge or delivery certainty. RWE's energy investment specialists support investors, buyers or asset owners to fully evaluate investment opportunities by translating technical, operational and commercial issues into clear recommendations.

### Your Benefits

---

- Improve performance of your assets or business
- Secure value for money
- Achieve required returns
- Optimise use of your assets
- Understand market drivers
- Understand technical and operational issues

## Our Scope

---

### **Due Diligence**

We conduct technical due diligence enabling buyers and investors to make better informed investments, negotiate favourable deal terms and to transform the performance of existing assets.

### **Bid Strategy/Project Procurement Advice**

We support our clients to secure project finance by conducting bid strategy or assistance through the project procurement process.

### **Business Strategy Advice**

Our strategic and economic advice helps our clients take the right direction. We evaluate and futureproof projects, businesses and plants against risks and challenges through our deep understanding of energy markets, energy assets and technical expertise.

Our specialists can optimise your business case preventing inefficiencies. We draw on sector experts from across RWE to deliver integrated and best-practice advice.
