

Project Leader/Senior Mechanical Engineer

Markus Burkhardt

Markus is a project leader and senior mechanical engineer with more than 39 years of experience in the power plant business. As project manager in the power generation and new build business he has worldwide experience of more than 20 years, mainly comprising the accomplishment of piping projects in all aspects of rehabilitation, life-time extension and upgrade planning. He has been responsible for the processing of a number of piping projects and gained profound experience with all different kind and sizes of power plants, including lignite, hard coal and gas as well as supercritical and ultra-supercritical plants.

Markus is well familiar in conducting owner engineering disciplines, tendering processes and working in multidisciplinary international teams, e.g., for single-Lot contracts, multi-Lot contracts as well as EPC contracts.

1 What gives you most satisfaction in your work?

Being part of a project team with the common aim to achieve a positive result for you. It is always a pleasure to see what humans are able to build up.

2 Why did you choose RWE TI?

I'm very proud to be a part of RWE TI because of its path of success. The history of RWE and their tremendous experiences in operating of large-scaled power plants motivates me every day to create an ongoing bright future.

3 "Our aim is your success" – What it means to me:

For me it is always important to have a goal, so wasting time and thus accompanying a loss of efficiency is not my thing. I am always trying to provide my capabilities as effective as possible to your satisfaction.
