

Project Engineer

Dominik Möllenbrink

Dominik is a senior engineer with experience in handling complex projects for nuclear and industrial applications at RWE Technology International.

His primary focus is the handling of large-scale Heating, Ventilation, and Air Conditioning (HVAC) projects, from planning support up till system commissioning. He also possesses skills in conducting research projects.

As a certified project manager (IPMA), he is able to bring complex projects to a successful conclusion and has very good experience in supplier- and claim management.

He speaks German and English and has experience working in European countries, including the UK and Switzerland.

Dominik completed his studies in Engineering, Environmental Science & Resource Management with Diploma at the Ruhr-University Bochum, Germany and University of Sheffield, UK.

1 What gives you most satisfaction in your work?

The most satisfaction, I get from working within a highly motivated team to find the best technical solutions for the challenges we face in our projects. I really enjoy working together as a team and discuss different technical approaches how to realize an efficient solution for our customers.

2 Why did you choose RWE TI?

In a way RWE Technology International chose me. As student I already worked for the RWE concern and I stayed in contact with my former boss, who approached me and told me about a job vacancy at RWE Technology International, which in my opinion was a really good fit for me so I applied for this job and after more than one year later I can say that it is really a perfect fit.

3 What three words best describes you?

Teampayer. Solution-oriented. Communicative.

4 „Your challenge is our passion!“ – What it means to me:

Our team will work highly committed to provide the best possible solution for our customers.
