

## Head of OCGT & Peakers **Jan Josef Bernholz**

In 2017, Jan started his career in the RWE-Group as a Graduate Project Engineer and handled various projects in the field of electrical power plants.

In 2015, he completed his studies at RWTH Aachen University with a Master's degree in Electrical Engineering and Business Administration. Prior to this, Jan completed an apprenticeship as a mechatronics technician.

Jan's professional experience in a wide range of energy fields with various management roles has enabled him to complete his expertise.

Having spent several years abroad, including in Kenya, Brazil, Italy and Scotland, Jan has been able to further strengthen his intercultural skills and affinity for languages.

All this helped him to ideally prepare for his current management role at RWE Technology International.

As Head of OCGT (Open Cycle Gas Turbine) & Peaker, Jan is looking forward to realising complex projects together with his teams.

### 1 What gives you most satisfaction in your work?

It is about working your way along the project – getting started with an idea and being challenged every day with the unknown until the project is completed.

### 2 Why did you choose RWE TI?

Because of RWE Technology International's project variety: It gives me the opportunity to learn a lot and constantly leave my comfort zone.

### 3 What three words best describes you?

Focus - Commitment - A positive mindset

### 4 "You get your best solution" –

What it means to me: To achieve the best solution for the client and meet his demand, I constantly ask for feedback.
