

Head of Batteries **Kevin Pasch**

Kevin has been working in various companies and positions in the energy supply sector in an international environment since 2013.

He specialises in the development, planning and construction of large-scale battery storage systems and can look back on more than ten years of experience in this field.

Kevin joined the RWE team in 2023 and has built up the development and product management department for battery storage systems.

Kevin completed his Master of Science degree in electrical engineering with honours at RWTH Aachen University in 2013.

As Head of Batteries, Kevin leads a team of highly motivated engineers and specialists and is looking forward to developing and realising the battery storage systems of the future and thus supporting the transformation of the energy supply.

1 What gives you most satisfaction in your work?

Working together with professional teams to actively shape new ways of restructuring the energy supply.

2 Why did you choose RWE TI?

I wanted to work for RWE TI because I can turn challenges into opportunities by working with highly motivated employees and the international environment inspires me.

3 What three words best describes you?

Determined - Curious - Reliable

4 „Your challenge is our passion!“

What it means to me: Challenging the status quo and developing new pathways.
