

Project Manager

## Patrick Bende

Patrick works as a Project Manager at RWE Technology International and he is responsible for internal and external projects.

At RWE Technology International he works for the waste to hydrogen Project FUREC. His responsibilities are schedule planner, managing and expediting contractors as well as structuring the project team.

Patrick has worked for battery, H2 and biomass projects in UK, Netherlands and in Germany.

He has extensive language skills in German, English and Dutch.

He completed his Master in Engineering Project Management at the Auckland University of Technology, in New Zealand.

### 1 What gives you most satisfaction in your work?

Growing together as a team while facing the various challenges during our daily project business is what gives me energy and satisfaction.

### 2 Why did you choose RWE TI?

Sustainable energy projects play a crucial role in combating climate change by reducing greenhouse gas emissions and promoting renewable energy sources. As a Project Manager at RWE Technology International, I can contribute directly to the transition towards cleaner and more sustainable energy systems, making a positive environmental impact. Being part of a company that gives me the opportunity to combine my technical and organizational skills with my sustainable beliefs made me choose RWE Technology International.

### 3 What three words best describes you?

Empathic. Structured. Open.

### 4 “You get your best solution“ – What it means to me:

Developing and tailoring a suitable solution to your requirements and needs drives me.
