

## Process Engineer **Saran Khan**

Saran brings technical expertise in the field of Chemical and Process Engineering.

He has several years of working experience in the heavy industry. His technical expertise has enabled him to manage and deliver several projects involving energy efficiency, environmental optimisation and sustainability.

In his role at RWE Technology International, Saran provides Process Engineering and Engineering Management support to various low carbon energy projects.

His main areas of focus are Green Hydrogen production and Power Plants integrated with Carbon Capture Systems.

He has language skills in English, Urdu and Hindi.

Saran completed his studies in Chemical and Process Engineering at the University of Strathclyde.

### 1 What gives you most satisfaction in your work?

I enjoy developing and applying technical solutions for various challenges, especially for the decarbonisation of energy.

### 2 Why did you choose RWE TI?

At RWE Technology International, I have the opportunity to work with experts and specialists on a wide range of projects related to securing a sustainable energy supply.

### 3 What three words best describes you?

Steadfast. Engaging. Supportive.

### 4 „Your challenge is our passion!“ – What it means to me:

We closely examine the challenges we encounter and are committed on providing the best solutions for them.
