

Senior Mining Engineer and Training Specialist

Martin Schmid (Dr.-Ing., M.E., FAusIMM)

Martin is a mining engineer with more than 25 years of professional experience, which results from worldwide mining-related consulting and engineering projects. He leads consulting and engineering teams in a variety of projects where his strong skills in process analysis and modelling as well as organisational planning and optimisation are valued.

For several years he has been responsible for the development and delivery of seminars and trainings for international professionals. The “RWE Operational Excellence Training (OpEx)” provides our customers with RWE’s extensive operational knowledge in all technical areas, for example in materials handling technology in opencast mining and in conventional power generation. In the latter area, the Engineering

Risk Assessment Process (ERAP) is often used to assess the plant and the portfolio.

Martin is honoured with two distinguished professional awards including the Hans-Röver-Award in 1996, the highest scientific award presented for the best innovative study in metal mining industry, and the Rudolf-Vogel-Award in 2002, presented for the best innovative scientific work at Technical University of Clausthal, Germany. Martin holds a PhD and a Master of Engineering in Mining Engineering from the Clausthal University of Technology in Clausthal-Zellerfeld, Germany. He is a Fellow Member of The Australasian Institute of Mining and Metallurgy (FAusIMM) and qualifies as a Competent Person in JORC code-based studies.

1 What gives you most satisfaction in your work?

The discovery of the hidden tricks of operational experience and the provision of services which often exceed our client’s expectations.

2 Why did you choose RWE TI?

The opportunity to export the German mining and power generation know-how of one of the most thorough and efficient companies worldwide: RWE.

3 “Your business is our daily work” – What it means to me:

We as RWE are passionate in what we do. We have the expertise to tackle our client’s challenges. From this we often forecast today what they should be thinking about tomorrow. This culture of continuous planning and every-day learning keeps us fit and ready for new opportunities.
