Development of operating result in Q1 2016

- Earnings in Conventional Power Generation under pressure mainly due to declining generation margins.

- Trading/Gas Midstream: Significantly higher earnings from energy trading.
- GPO: Higher costs to operate and maintain our grid infrastructure more than compensated by misc. offsetting effects.

Outlook for 2016 confirmed

1 The outlook accounts for the current status of the nuclear fuel tax law. In case the Constitutional Court declares the tax illegal and decides fully in our favour, we expect a positive earnings contribution of up to €1.7bn to EBITDA, operating result and adjusted net income.

2 Suspension of the dividend payment to holders of common shares for fiscal 2015. For owners of preferred shares, dividend corresponds to the preferred share of profits of €0.13 per share stipulated by the Articles of Incorporation.
