Comments on H1 2026

Offshore Wind

> Offshore Wind: Higher generation volumes due to better wind conditions across the fleet and first commissioning-phase generation from Thor prior to COD

Onshore Wind / Solar

> Onshore Wind / Solar: Commissioning of new generation capacity in the US and Europe; worse solar conditions in US; better weather conditions in Europe

Flexible Generation

- > Biomass NL: Lower generation volumes due to lower availability of Amer
- > Gas GER: Lower generation volumes due to overhaul at Emsland D
- > Gas UK: Market price driven slightly lower generation volumes
- > Gas NL: Market price driven higher generation volumes
- > Gas Türkiye: Market price driven lower generation volumes
- > Other NL (hard coal): Market price driven lower generation volumes

Phaseout Technologies

> Lignite: No material deviation compared to prior year

Comments on Q2 2026

Offshore Wind

> Offshore Wind: Higher generation volumes due to better wind conditions across the fleet and first commissioning-phase generation from Thor prior to COD

Onshore Wind / Solar

> Onshore Wind / Solar: Commissioning of new generation capacity in the US and Europe; worse wind and solar conditions in US; weather conditions in Europe nearly on prior year level

Flexible Generation

- > Biomass NL: Market price driven higher generation volumes
- > Gas DE: Lower generation volumes due to overhaul at Emsland D
- > Gas UK: Market price driven higher generation volumes
- > Gas NL: Market price driven higher generation volumes
- > Gas Türkiye: Market price driven lower generation volumes

Phaseout Technologies

> Lignite: Lower generation volumes mainly driven by overhauls

¹ Including minor 'other' technologies (pumped storage and batteries).

Note: Rounding differences may occur.

Load factor - Country

%	Offshore wind		Onshore wind		Solar	
Apr - Jun (Q2)	2026	2025	2026	2025	2026	2025
Germany	16%	18%	12%	14%	18%	18%
United Kingdom	34%	31%	23%	21%	9%	
Netherlands			18%	21%	19%	17%
Poland			19%	26%	22%	20%
France			18%	18%	14%	
Spain			13%	15%	20%	25%
Italy			21%	19%	26%	31%
Sweden	n/a	44%	n/a	25%		
Australia					10%	10%
USA			34%	35%	31%	32%
Other countries	n/a		23%	14%	27%	30%
Total	29%	27%	27%	28%	28%	30%

Note: Load factor based on simplified calculation methodology, i.e. settlement generation volume divided by average of quarter end installed generation capacity; prior-year figures adjusted.

Accounting treatment¹

	Model 1	Model 2	Model 3a	Model 3b	Model 4
	Fully consolidated in the consolidated financial statements		Equity method	Joint operations	Other investments
RWE share of project ²	100%	>50%, < 100%	>20%, = < 50%	>20%. = < 50%	>0% - 20%

Other investments	n/a	n/a	n/a	n/a	pro rata

¹ Accounting treatment refers to list of shareholding tables in RWE's annual report.

² RWE's share of project corresponds to the voting rights and no adverse provisions in shareholders agreement are agreed, which would influence RWE's ability to control, jointly control or significantly influence that company.

³ Net income after tax.

⁴ Dividend.

⁵ Capital & shareholder loan increase/decrease.

⁶ Disregarding any financing structure (e.g. tax equity, project financing etc.).
