Comments on 9M 2026

Offshore Wind

> Offshore Wind: Higher generation volumes due to first pre-commissioning generation from construction projects prior to COD and better wind conditions across the fleet

Onshore Wind / Solar

> Onshore Wind / Solar: Commissioning of new generation capacity in the US and Europe; stronger wind but weaker solar conditions in the US; better weather conditions in Europe

Flexible Generation

> Biomass NL: Market price driven higher generation volumes, partly offset by unavailability of Amer in Q1 2026

> Gas GER: Lower generation volumes due to unavailabilities at Emsland

> Gas UK: Market price driven lower generation volumes

> Gas NL: Market price driven higher generation volumes

> Gas Türkiye: Market price driven lower generation volumes

> Other NL (hard coal): Market price driven higher generation volumes

Phaseout Technologies

> Lignite: Lower generation volumes mainly driven by outages

Other investments	n/a	n/a	n/a	n/a	pro rata

[1] Accounting treatment refers to list of shareholding tables in RWE's annual report.

[2] RWE's share of project corresponds to the voting rights and no adverse provisions in shareholders agreement are agreed, which would influence RWE's ability to control, jointly control or significantly influence that company.

[3] Net income after tax.

[4] Dividend.

[5] Capital & shareholder loan increase/decrease.

[6] Disregarding any financing structure (e.g. tax equity, project financing etc.).
