## Notes at 31 December 2014

### Basis of presentation

The financial statements have been prepared in accordance with the German Commercial Code (HGB) and the German Stock Corporation Act (AktG). Individual balance sheet and income statement items have been combined in order to improve clarity. These items are stated and explained separately in the

notes to the financial statements. The income statement has been prepared using the nature of expense method. The financial statements have been prepared in euros (€) and amounts are stated in millions of euros (€ million).

### Accounting policies

Investments in affiliated companies and investments are stated at cost or at lower fair values.

Expenses incurred prior to the balance-sheet date are reported under prepaid expenses if they represent expenses for a certain period thereafter.

Long-term securities are valued at cost or lower market value.

Within the framework of the corporate and trade tax group, all deferred taxes of the group are attributable to RWE AG as the parent company and hence as the entity liable to pay tax, insofar as continued existence of the group is expected. The capitalisation option pursuant to Sec. 274, Para. 1 Sentence 2 of HGB is exercised in such a manner that, after netting deferred tax assets and deferred tax liabilities, a net asset position is reported as deferred tax assets. The measurement of deferred taxes is based on a group-specific tax rate of 31.4%.

Loans and employer loans are accounted for at nominal value or at lower fair value.

Provisions are recognised at the settlement amount dictated by prudent business judgement.

Cash and cash equivalents, accounts receivable and other assets are disclosed at nominal value after deducting required value adjustments. All identifiable individual risks are taken into account. Non-interest-bearing accounts receivable for other assets are discounted to their present value. Current securities are valued at cost or lower market value.

Provisions for pensions and similar obligations are based on actuarial computations using Klaus Heubeck's 2005G reference tables – which take into account generation-dependent life expectancies – applying the projected unit credit method. They are discounted using the average market interest rate for the previous seven years published by the German Bundesbank, taking an assumed remaining maturity of 15 years as a basis (Sec. 253, Para. 2, Sentence 2 of HGB); the interest rate in December 2014 was 4.53% (previous year: 4.88%). In respect of other calculation assumptions, annual wage increases of 2.35% (previous year: 2.75%), pension increases of 1.0% and 1.6% to 1.75% (previous year: 1.0% and 1.75%) and company-specific fluctuation assumptions were taken as a basis. Insofar as there are special-purpose funds pursuant to Sec. 246, Para. 2 of HGB, the provision derives from the balance of the actuarial present value of the obligations and the fair value of the special-purpose funds; the fair value essentially corresponds to the market value of the special-purpose funds. After netting, the impact of changes in the discount rate, changes in the fair value of the special-purpose funds and ongoing returns on the special funds are reported in net interest.

Measurement of provisions for service anniversary obligations and for pre-retirement part-time employment occurs on the basis of actuarial principles, using an interest rate of 4.54% (previous year: 4.9%) and 3.09% (previous year: 3.65%), respectively.

All identifiable risks, uncertain liabilities and anticipated losses from pending business transactions are taken into account in the assessment of other provisions.

Liabilities are valued at settlement amounts.

Contingent liabilities are valued according to the extent of liability existing as of the balance-sheet date.

Insofar as possible, valuation units pursuant to Sec. 254 of HGB are formed.

Foreign currency transactions are recognised at the exchange rate prevailing at the time of first entry or – when hedged – at the forward rate. Receivables and liabilities which are not hedged are measured as at the balance-sheet date, taking into account the impairment principle for maturities over one year.

Bonds consist mainly of hybrid bonds and the medium-term notes of RWE AG with varying maturities and interest rates.

Bank debt principally relates to bank loans, cash collateral received, and interest accruals for existing swap agreements.

Accounts payable to affiliated companies concern the transfer of financial resources, tax group accounting settlements and ongoing clearing transactions.

Other liabilities relate primarily to interest accruals.

### **(10) Deferred income**

This item exclusively relates to accrued interest equalisation payments.

### **(11) Contingent liabilities**

Contingent liabilities include guarantees, warranty agreements and liabilities from the provision of collateral for external liabilities. These are granted to support Group companies in their business operations and to cover the claims of the employees.

Liabilities from guarantees comprise performance and warranty guarantees totalling €75 million, of which €55 million relates to current business conducted by affiliated companies.

Liabilities from warranty agreements totalled €20,710 million, of which €19,783 million relates to warranties for the benefit of affiliated companies. Specifically, these break down as follows:

Guarantees to third parties in the amount of €5,943 million were extended for the benefit of affiliated companies.

Joint and several liabilities of €1,675 million relate to the granting of lines of credit (bank guarantees), in accordance with their respective use. Of this, €1,357 million pertains to guarantees for the benefit of affiliated companies and investments from so-called ancillary facilities.

As of the balance-sheet date, there were payment guarantees to the creditors of the bonds issued by RWE Finance B.V., 's-Hertogenbosch/Netherlands (a 100% subsidiary of RWE AG) totalling €12,410 million, within the scope of the debt issuance programme.

There are joint and several liabilities from the transfer of pension obligations to six affiliated companies in the amount of €73 million.

On the basis of a mutual benefit agreement, RWE AG and other parent companies of German nuclear power plant operators undertook to provide €2,244 million in funding to liable nuclear power plant operators to ensure that they are able to meet their payment obligations in the event of nuclear damages. RWE AG has a 25.851% contractual share in the liability, plus 5% for damage settlement costs.

Contingent liabilities from the provision of collateral for external liabilities amount to €114 million and include coverage for credit balances stemming from the block model for pre-retirement part-time work, pursuant to Sec. 8a of the Pre-Retirement Part-Time Work Act (AltTZG) and from the management of long-term working hours accounts pursuant to Sec. 7e of the German Code of Social Law (SGB IV) in the RWE Group. To this end, marketable securities in a total amount of €281 million were deposited in a trust account. This coverage applies mainly to the employees of Group companies and to a lesser degree to employees of RWE AG.

RWE AG is a co-guarantor for a joint and several liability in accordance with Sec. 133 of the German Company Transformation Act (UmwG) in connection with transactions under company transformation law.

Contingent liabilities are only assumed within the scope of our business activities and after in-depth analysis of the related risks. We continuously monitor the aforementioned issues within the framework of our risk management system. In our assessment, the underlying liabilities can probably be discharged by the parties with primary responsibility. Accordingly, it is not probable that these will materialise and thus the contingent liabilities assumed need not be recognised as liabilities.

### **(12) Other financial obligations**

The total amount of other financial obligations is €1,401 million and pertains to the following items:

The co-shareholders of an affiliated company have the right to tender their shares in this company. Full exercise of this right to tender can lead to a financial obligation of €1,198 million.

There is an obligation stemming from financing commitments to effect further contributions of up to €176 million to the equity capital of an investment in the following years.

Other future – undiscounted – financial obligations from leases and rent amount to €27 million and relate to an affiliated company.

Other currently unquantifiable financial obligations may arise on the basis of the following:

Due to the transfer of certain pension obligations to RWE Pensionsfonds AG in previous years, RWE AG, the affiliated companies and investments which entered into the Pensionsfonds agreement are legally obligated to contribute further capital in their function as employer in the event that the Pensionsfonds has insufficient funds in the future.

RWE AG and some of its subsidiaries are involved in official, regulatory and anti-trust procedures, lawsuits and arbitration proceedings in connection with their business operations and/or are affected by the results of such. Out-of-court claims have

also been filed. However, RWE does not expect such to have any material negative effects on the RWE Group's economic or financial situation.

### (13) Derivative financial instruments and valuation units

Derivative financial instruments are used to hedge currency and interest rate risks from foreign currency items, cash investments and financing transactions.

The following overview shows the derivative financial instruments as of 31 December 2014:

€ million	Nominal volume		Remaining term > 1 year		Fair value	
	External	Within the Group	External	Within the Group	External	Within the Group
Foreign currency derivatives						
Foreign exchange forwards	1,603	13,187	374	3,284	-41	0
Interest rate currency/currency swaps	18,960	2,247	2,857	798	90	-268
Options	3,916				0	
	<b>24,479</b>	<b>15,434</b>	<b>3,231</b>	<b>4,082</b>	<b>49</b>	<b>-268</b>
Interest rate swaps	5,809	3,515	4,990	2,696	257	-12
	<b>30,288</b>	<b>18,949</b>	<b>8,221</b>	<b>6,778</b>	<b>306</b>	<b>-280</b>

0 = Small amount.

The fair value generally corresponds to the market value of the derivative financial instrument, if such value can be reliably determined. If the market value cannot be determined reliably, the fair value is derived from the market value of similar financial instruments or using generally accepted valuation methods; these include the discounted cash flow method and the Black-Scholes model, if options are involved. This occurs taking into consideration current exchange rate relationships, market-conform yield curves and credit default risks of the counterparties.

The derivatives listed in the table above are included in the valuation units described below as underlying or hedging transactions. The volume of risks hedged with valuation units amounts to a total of €1,344 million; of this, €929 million is related to currency risks, €283 million to interest rate and currency risks, and €132 million to interest rate risks.

Within the scope of currency hedging, among other things, interest rate and interest rate currency swaps as well as matching off-setting transactions have been concluded with wholly-owned subsidiaries. RWE AG's derivative transactions concluded with banks and the respective offsetting transactions

are grouped into valuation units, resulting in no re-measurement gains or losses. This occurs with the use of micro hedges (i.e. clear allocation of underlying transactions and hedges). The subsidiaries use these swaps and foreign currency liabilities to hedge the prices of their foreign investments. On termination of a swap, the positive or negative market value is offset against the cost of the underlying transactions without an effect on profit or loss.

Currency swaps and foreign exchange forwards are concluded to hedge Group companies' foreign-currency receivables and liabilities (micro hedges).

Both interest rate swaps and interest rate currency swaps are used to hedge bonds and notes payable (micro hedges).

Furthermore, interest rate swaps and foreign currency derivatives were concluded for individual interest rate and currency risks associated at RWE AG and Group companies; most of these were passed on to Group companies congruently. These include both micro hedges and portfolio hedges, in which derivatives with the same currency risks are pooled together.

Changes in the market value of derivatives are offset by the corresponding opposite changes in the market value of the existing underlying transactions. Effectiveness is demonstrated via a proper, adequate risk management system. Provisions for possible losses of €38 million were formed for the negative balances of portfolio hedges.

Internal directives that are binding upon RWE AG and its subsidiaries define the range of action, responsibilities and controls allowable when trading with derivatives. In particular, with the

exception of proprietary energy trading transactions, derivative financial instruments may only be used to hedge risks arising from underlying transactions and associated liquidity investment and financing procedures. All external counterparties have good credit ratings.

Original financial instruments which are included with the aforementioned derivative financial instruments in valuation units (micro hedges) are shown in the following table:

€ million	Carrying amount 31 Dec 2014	Fair value 31 Dec 2014	Of which: with a remaining term				
			Up to 1 year	2 – 5 years	> 5 years		
<b>Financial receivables</b>							
Hedged risk:							
Currency	9,195	9,034	3,724	551	4,758		
<b>Financial liabilities</b>							
Hedged risk:							
Currency	-5,991	-5,748	-532		-5,215		
Interest rates and currencies	-1,298	-1,086		-1,156	71		
Interest rates	-400	-455		-455			
	<b>-7,689</b>	<b>-7,289</b>	<b>-532</b>	<b>-1,611</b>	<b>-5,144</b>		

Measurement gains and losses on these financial receivables and liabilities are offset by the corresponding opposing amounts from realisations and changes in the fair value of the hedging transactions.

Based on the similarity of the amounts, risks and terms involved, the valuation units were marked by a high level of efficiency, which is demonstrated using the Critical Terms Match method.

Measurement of valuation units occurs using the net hedge presentation method.

The decline in the number of employees is primarily due to the group-wide reorganisation of cross-divisional functions and the bundling of internal services in RWE Group Business Services GmbH, Essen.

**(18) Other operating expenses**

Other operating expenses primarily include administrative expenses. Other taxes in the amount of €23 million (previous year: small amount) are also reported; during the year under review these represent expenses not related to the period.

**(19) Taxes on income**

Taxes on income contain the current taxes for the fiscal year and prior years as well as an expense of €113 million for the release of deferred tax assets (previous year: €17 million).

# INDEPENDENT AUDITOR'S REPORT

To RWE Aktiengesellschaft, Essen

## Report on the Annual Financial Statements

We have audited the accompanying annual financial statements of RWE Aktiengesellschaft, Essen, which comprise the balance sheet, the income statement and the notes to the financial statements, together with the bookkeeping system, for the business year from 1 January 2014 to 31 December 2014.

### Board of Managing Directors' Responsibility for the Annual Financial Statements

The Board of Managing Directors of RWE Aktiengesellschaft is responsible for the maintenance of the books and records and the preparation of these annual financial statements. This responsibility includes that these annual financial statements are prepared in accordance with German commercial law and that these annual financial statements give a true and fair view of the net assets, financial position and results of operations of the Company in accordance with (German) principles of proper accounting. The Board of Managing Directors is also responsible for the internal controls as the Board of Managing Directors determines are necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's Responsibility

Our responsibility is to express an opinion on these annual financial statements, together with the bookkeeping system, based on our audit. We conducted our audit in accordance with § (Article) 317 HGB ("Handelsgesetzbuch": "German Commercial Code") and German generally accepted standards for the audit of financial statements promulgated by the Institut der Wirtschaftsprüfer (Institute of Public Auditors in Germany, IDW) and additionally observed the International Standards on Auditing (ISA). Accordingly, we are required to comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the annual financial statements are free from material misstatement.

An audit involves performing audit procedures to obtain audit evidence about the amounts and disclosures in the annual financial statements. The selection of audit procedures depends on the auditor's professional judgment. This includes the assessment of the risks of material misstatement of the annual financial statements, whether due to fraud or error. In assessing those risks, the auditor considers the internal control system relevant to the Company's preparation of annual financial statements that give a true and fair view. The aim of this is to plan and perform audit procedures that are appropriate in the given circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control system. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Managing Directors, as well as evaluating the overall presentation of the annual financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Audit Opinion

According to § 322 Abs. (paragraph) 3 Satz (sentence) 1 HGB, we state that our audit of the annual financial statements has not led to any reservations.

In our opinion based on the findings of our audit, the annual financial statements comply, in all material respects, with the legal requirements and give a true and fair view of the net assets and financial position of the Company as at 31 December 2014, as well as the results of operations for the business year then ended in accordance with (German) principles of proper accounting.

We conducted our audit in accordance with § 317 Abs. 2 HGB and German generally accepted standards for the audit of the combined management report promulgated by the Institut der Wirtschaftsprüfer (Institute of Public Auditors in Germany) (IDW). Accordingly, we are required to plan and perform the audit of the combined management report to obtain reasonable assurance about whether the combined management report is consistent with the annual financial statements and the audit findings, as a whole provides a suitable view of the Company's position and suitably presents the opportunities and risks of future development.

According to § 322 Abs. 3 Satz 1 HGB we state, that our audit of the combined management report has not led to any reservations.
