Counter motions by Konrad Prose, in respect of the Annual General Meeting of RWE
AG on 27 April 2017

Counter motion regarding items 3 and 4 on the Agenda

I hereby file a motion against approving the acts of the Executive Board and the Supervisory Board and will ask the shareholders to do the same!

Rationale: the poor performance in the last few years; suspension of the dividend!

The reason is not just the short-sighted planning with respect to the generation of electricity from renewable sources, but also in part the rude treatment of small customers by the alleged monopolist!

Question: How many customers has RWE lost to other providers/utilities since 2014? Question: How many customers will be won after the foundation of innogy?

Here is one example of this rude treatment: on 6 December 2016, I requested in writing that the gas meter installed in my home in 1996 be inspected and/or replaced as I doubted that it reflected my consumption accurately. I was asked to pay about 300 euros for a meter that was more than 20 years old and had never been calibrated during that time. I refused to do so because I am of the opinion that a consumption meter should be replaced free of charge after 20 years, also because rent was paid for the meter during this period.

If a utility refuses to do so, the legislator should intervene and regulate the calibration intervals legally. They could then be set at once every 5 or 10 years!

I am submitting the correspondence with innogy and Westnetz to the Executive Board for its information and request that it take a position on this!

Signed: Konrad Prose
