

Press release

Thor offshore wind farm receives green light for electricity production from the Danish Energy Agency

- **30-year electricity production licence granted**
- **Construction of 1.1-gigawatt Thor offshore wind farm remains on track, with turbine installation set to begin this spring**
- **When completed in 2027, Thor will be able to power equivalent of more than one million Danish homes**

Copenhagen, 26 January 2026

Today, the Danish Energy Agency granted a 30-year electricity production licence to Thor offshore wind farm, marking a significant milestone for what will become Denmark's largest offshore wind project. With a total installed capacity exceeding one gigawatt, Thor is expected to supply renewable electricity to the equivalent of approximately one million Danish households once fully operational in 2027.

Pernille Asgaard Haaning, CEO RWE Renewables Denmark: "We are very pleased to have received the electricity production licence for Thor offshore wind farm from the Danish Energy Agency. This represents a key milestone on our journey to deliver Denmark's largest offshore wind project. Once all turbines are fully operational, Thor will play a crucial role in achieving Denmark's climate goals and in strengthening both Denmark's and the EU's energy security."

Construction of Thor is progressing according to plan. Last year, the offshore substation and all foundations for the 72 wind turbines were successfully installed 22 kilometres off the west coast of Jutland. Turbine installation is scheduled to commence from the Port of Esbjerg, Denmark this spring.

Thor offshore wind farm is a joint project between RWE (51%) and Norges Bank Investment Management (49%). RWE is in charge of construction and operations throughout the lifecycle of Thor offshore wind farm.

RWE

RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. This is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driven by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations, and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
