

Press release

RWE successful with 31 solar projects in Polish auction

- **RWE solar projects awarded with a total capacity of 102 MWdc/84 MWac**
- **Solar plants with a total capacity of more than 100 MWac under construction in Poland**

Essen/Warsaw, 3 January 2025

RWE is building solar farms with a total capacity of more than 100 megawatts (MWac) across Poland. Now RWE has been successful in the latest auction for Renewables in Poland: the Polish regulator, Urząd Regulacji Energetyki (URE), has awarded RWE 31 solar projects with a total capacity of 102 megawatts of direct current (MWdc), which corresponds to 84 MW alternate current (MWac). Most of the projects have received all permits and are scheduled to start construction in early 2025.

Katja Wünschel, CEO RWE Renewables Europe & Australia:

“31 solar projects awarded. This is a great success and underlines our intention to further expand the use of solar energy in Poland, where we already have 91 MWac of solar capacity in operation and more than 100 MWac under construction today. We are looking forward to delivering the next projects to further support the Polish energy transition.”

RWE in Poland – a key driver of the energy transition

RWE is a key player in the Polish renewables market. RWE Renewables Poland operates wind farms with a total installed capacity of 541 MW and solar parks with a total capacity of 91 MWac. Further green projects are under development. Building on its long-established renewables business in Poland, RWE is currently developing its first Polish offshore project, the [F.E.W. Baltic II](#) offshore wind farm.

RWE

RWE is leading the way to a clean energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
