

Press release

More wind power for the Rhenish lignite area – RWE commissions additional turbines at Wiedenfelder Höhe wind farm

- **Three state-of-the-art turbines with a total wind capacity of 17.1 MW installed**

Essen, 2 June 2026

RWE has completed the expansion of its Wiedenfelder Höhe wind farm in Bergheim in the Rhenish lignite area. Three new 5.7-MW wind turbines have recently started operating on the recultivated spoil tip of the former Fortuna-Garsdorf opencast mine, delivering a total of 17.1 megawatts (MW) to the grid. The existing wind farm, built in 2017, has a capacity of 13.2 MW. The site now has seven turbines in total, with a combined capacity of 30.3 MW – enough to supply the equivalent of around 16,000 households with green electricity per year.

Sopna Sury, CEO RWE Renewables Europe & Australia: “By making efficient use of recultivated land in the Rhenish lignite area, we are creating local value for a region undergoing structural change. With these state-of-the-art wind turbines on the Wiedenfelder Höhe, we are providing even more secure, locally generated and climate friendly renewable electricity from the district. This also benefits the local population, as we are paying 0.2 cents per kilowatt-hour generated to the surrounding municipalities. This equates to projected annual revenue of up to 60,000 euros from the new turbines alone.”

Green growth in the domestic market

Onshore wind energy plays a decisive role in the energy transition, forming one of the cornerstones of the expansion of renewable energies. RWE is currently constructing wind farms in the Rhenish lignite area with a planned total capacity of 74 MW ([Bedburg](#), Düren-Merken; 267 MW already installed in the Rhenish lignite area). To establish a strong presence in the regional wind and solar industries, RWE has seven regional offices throughout Germany. In order to further advance the expansion of renewable energy, the company is searching nationwide for suitable sites for wind, solar and battery projects. RWE

RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in over 20 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. This is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driven by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose – Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations, and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
