

Press Release

RWE secures 119 MW of onshore wind capacity in latest German auction

- **RWE awarded contracts for the Jüchen 3 wind farm (84 MW) and the Seedorf repowering project (35 MW)**
- **Commissioning planned for 2028, subject to final investment decisions**

Essen, 18 September 2026

RWE has secured contracts for two onshore wind projects with a combined capacity of 119 megawatts (MW) in the latest auction held by Germany's Federal Network Agency (Bundesnetzagentur). Subject to a final investment decisions, both wind farms are scheduled to be commissioned in 2028.

The **Jüchen 3** greenfield project is planned on recultivated land at the former Garzweiler open-cast mine in the Rhein-Kreis Neuss district of North Rhine-Westphalia with an installed capacity of 84 MW.

The **Seedorf** repowering project involves the modernization of RWE's existing wind farm in the Rotenburg (Wümme) district of Lower Saxony. Five existing turbines with a combined capacity of 9 MW are planned to be replaced by five modern turbines with a total installed capacity of 35 MW.

Green growth in the domestic market

Renewable energies are the cornerstone of a secure energy supply in the face of rising electricity demand. Electricity generation from onshore wind farms is particularly cost-effective and has a proven track record. RWE operates onshore wind farms in Germany with a capacity of around 770 MW and is continuously expanding them. To ensure a strong presence in the regionally focused wind and solar sector, RWE is active throughout Germany.

RWE

RWE is shaping the energy world of tomorrow. To this end, the company is investing billions of euros in offshore and onshore wind, solar energy, battery storage, flexible generation assets and, through its shareholding in Amprion, in the expansion of Germany's transmission grid. The portfolio is complemented by its global energy trading business. RWE is already one of the leading companies in the field of renewable energy. Around 20,000 employees work for the company worldwide. With its integrated portfolio and broad project pipeline, RWE is ideally positioned to meet the growing global demand for electricity driven by electrification and artificial intelligence. At the same time, the company is making an important contribution to ensuring a secure, affordable and climate-friendly energy supply. RWE is decarbonising its business in line with the 1.5-degree reduction pathway, will phase out coal by 2030 and aims to achieve net zero by 2040 – fully in line with the company's purpose: Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
