

## Press release

# RWE to market green electricity from Polish wind farm to local industry

Essen/München 14 March 2023

RWE Supply & Trading is to provide a significant share of the green electricity produced by the Polish onshore wind farm "Windfarm Polska III", including the certificates of origin, totalling around 180 gigawatt hours. The green electricity will be delivered to Polish industrial customers in the construction sector for a period of 10 years from 2023 onwards. The 132-megawatt Polska III wind farm belongs to a wholly owned subsidiary of [Stadtwerke München](#) (Munich City Utilities). It is in the windy north of Poland (70 km south-east of Gdansk) and was commissioned in 2021.

RWE is one of the world's leading producers of electricity from renewable sources, with a large portfolio of green power. RWE's Energy Trading division already supplies many major industrial customers in Europe and the USA with green electricity via power purchase agreements from RWE's own plants as well as third-party plants. RWE thus helps industrial customers achieve their climate protection targets. Poland is one of RWE's European focus markets. There, the company operates wind farms with a capacity of around 480 megawatts and is one of the five largest onshore wind power operators.

Stadtwerke München (SWM) has been a pioneer in the energy transition since 2008 with its "Renewable Energy Expansion Campaign". The communal utility company has not only been expanding renewable energy generation in the Munich area but also developing further potential in Germany and Europe. In addition to Poland, SWM is active in eight other countries, primarily in onshore and offshore wind. The company covers most of the value chain, from planning and construction to operation and marketing of green electricity.

### **RWE Supply & Trading GmbH**

RWE Supply & Trading is the interface between RWE and the energy markets around the world. Approximately 1,600 employees from over 50 different countries trade (renewable) electricity, (green) gas, commodities, and CO<sub>2</sub> emission allowances. Accurate market analyses and a high degree of customer centricity enable them to create innovative energy supply solutions as well as risk management concepts for industrial operations. The trading entity also ensures the commercial optimisation of RWE's power plant dispatch and markets electricity from renewables. In addition, there are the legally independent RWE gas storage companies in Germany and Czech Republic under the umbrella of RWE Supply & Trading.

### **Stadtwerke München**

Stadtwerke München (SWM) is one of the largest energy and infrastructure companies in Germany. More than one million private households, medium-sized companies and business customers benefit from SWM's services every day. SWM supplies Munich with energy (electricity, natural gas, district heating/district cooling), fresh drinking water, mobility, and state-of-the-art telecommunications services. Sustainability and climate protection are essential cornerstones of SWM's corporate policy in all areas. With investments in the Munich region and throughout Europe, SWM aims to produce enough green electricity in its own plants from 2025 and beyond to cover Munich's entire demand. 90 percent of this target has already been achieved. You can find more information at [www.swm.de](http://www.swm.de)
