RWE

Senior Engineer
Jeevanthi Vivekananthan

Jeevanthi is an electrochemist and an expert in hydrogen and energy storage projects in the automotive industry.

After successfully completing her Ph.D. at Ruhr University Bochum, since 2021 Jeevanthi is particularly contributing her professional expertise as a senior engineer within projects in the field of hydrogen. She benefits from her experience in project management and in leading complex projects.

Her profound knowledge from her 5 years of professional experience in the special fields of energy conversion and storage (especially fuel cell, electrolyzer, redox flow battery)

as well as her knowledge in electrochemistry, surface technology also sensor technology and nanotechnology can be optimally applied to her work in current hydrogen projects.

In addition, Jeevanthi has professional experience in intellectual property and the preparation of patents.

Characterized by her international work in multi-divisional project teams, Jeevanthi has comprehensive intercultural competences combined with her very good language skills in Tamil, English, German, French and Spanish.

1 What gives you most satisfaction in your work?

I especially like that I can contribute to the energy transition along the entire value chain through the elaboration of new challenging pathways for the energy sector. In addition, within the projects I am able to look beyond the boundaries.

2 Why did you choose RWE TI?

RWE as a pioneer in the energy transition is a globally leading energy supplier, who supports customers along the entire hydrogen energy value chain. I would like to support RWE Technology International with my knowledge and skills to accelerate the green transition for a sustainable life. Here I am able to look beyond the boundaries!

3 What three words best describes you? Responsible-mined, cross-cultural

Communicative. Solution-oriented. Goal-oriented.

4 „Your challenge is our passion!" – What it means to me:

Customers challenges are our passionated motivation and with our solutions we direct our customers to their success!
