

RWE & BASF: Cooperation for Climate Protection

2 gigawatt offshore wind farm

RWE

RWE

Additional planned electrolysis capacities for the production of green hydrogen – savings of up to 1.0 million metric tons of CO₂ per year by additional industrial partners

Use of existing infrastructure to additional industry partners

RWE Power plant site

H₂ storage

BASF

Emission-free production processes for basic chemicals
Savings of up to 2.8 million metric tons of CO₂ per year

Ludwigshafen Verbund site
